PROFESSIONAL SUMMARY

Aspiring Full Stack Developer focused on building AI-Enabled Applications with a robust command over MERN stack, database optimization, and data structures. Hands-on experience integrating Large Language Models and building secure, scalable backends with RESTful APIs. Proactive problem-solver skilled in building modern version control pipelines, automated tests, and delivering pixel-perfect user interfaces.

EDUCATION

Management Education and Research Institute (MERI)

Aug. 2023 – May 2027

Bachelor of Technology in Computer Science Engineering

Delhi, India

PROJECTS

AI Chat Application (Agentic) | *JavaScript, Node.js, Gemini API, MCP, RESTful APIs, Git* [In Progress]

- Integrating Large Language Models via Gemini API (Free Tier) to build intelligent automation workflows, conversational chatbots, and context-aware summary engines.
- Implementing Model Context Protocol (MCP) tools for reliable context orchestration and dynamic background data fetching.
- Building secure backend routing architecture and structural code endpoints while executing modular test coverage.
- Leveraging Git and GitHub for structural tracking, collaborative source control, and structured code documentation.

Home Bliss Furniture | *React.js, Node.js, Express.js, MongoDB, SQL, RESTful APIs*

Full-Stack E-Commerce Website (<https://home-bliss-ecommerce.vercel.app/>)

- Developed a fully responsive, pixel-perfect e-commerce platform using React.js and standard modern frameworks for seamless frontend interaction.
- Architected a modular and scalable backend with Node.js and Express.js to maximize query optimization and minimize API latency.
- Designed robust RESTful APIs to process complex object-mapping rules, real-time inventory adjustments, and multi-tier filtering.
- Managed NoSQL storage using MongoDB schemas while implementing optimized lookup sorting routing and baselines for relational query migrations.

TECHNICAL SKILLS

Languages: JavaScript, C++, Python, SQL

Data Structures: Arrays, Strings, Linked Lists, Stacks, Queues, Trees, Hashing, Recursion, Sorting, Searching, Binary Search

Front-End: React.js, HTML5, CSS3, Tailwind CSS, JavaScript

Back-End &

Database: Node.js, Express.js, RESTful APIs, MongoDB, PostgreSQL/MySQL (Basics)

AI & Cloud Tools: Gemini API (Free Tier), LangChain (Basics), LLMs, MCP, AWS/Firebase (Basics)

Workflow & Dev: Git, GitHub, Docker & Jenkins (Basics), Jest/Mocha (Basics Testing)

KEY BEHAVIOURAL TRAITS

- Continuous Learner:** Actively stays updated with emerging trends in full-stack engineering and artificial intelligence.
- Cross-Functional Collaborator:** Communicates technical logic clearly and works effectively across team sprints and documentation reporting.
- Ownership & Quality Assurance:** Dedicated to writing thoroughly documented, easily maintainable code while strictly adhering to testing and version protocols.
